

Recent Golf Course Improvements

Short Game Facility

Expanded short game area featuring an elevated, full-scale green (just under 6,000 sq ft.), two sandy bunkers and grassy hollows and a variety of uneven lies; accommodates 40 yd approach shot

Cart Barn

Cart barn replacement and relocation

Golf Course

- Seven or eight forward tees added allowing many par 4's and 5's to be played 20-50 yards shorter
- Widened over half the fairways to bring them more in line with how the course was originally designed.
- Back tees on #2 and #12 were added lengthening both holes by around 20 yards.
- Hole #3 approach was significantly widened. Additionally, cleaning up of the scrub on the hillside along with tree removal was performed
- The removal of the cart path and right bunker on hole #14
- The hill sides on hole #9 and #18 cleaned and over seeded
- Completed steps at #10 tee. The steps go through the pine trees at the tee - a nice addition for all of our walkers and caddie users.
- Hole #15 had significant aproning added to the green for better playability
- Comprehensive overhaul on the greens of hole #1 and #18. Drainage enhancements were added as well as significant addition to the apron around each green to enhance playability and shot-making.
- Removed or repositioned several traps on both hole #1 and #18
- Eliminated dozens and dozens of evergreens (not indigenous to the area) and unsightly trees. Enhanced the playability and sightlines of several holes.
- Continued tree removal
- Spring 2017 Hole #9 green renovations: enlarging the green, reconstructing and removing of bunkers and adding significant apron, especially to the left of the green, to enhance the playability.

Cart Path

Cart paths repair: many areas are receiving a patch to fix smaller pot holes. The larger more deteriorated areas are being removed and replaced with gravel.
